ELECTION WITH TRAVERSE

The Office Action has imposed a restriction requiring election of one of seven (7) distinct inventions (Groups).

I.   Claims 1-21, drawn to a communication hub.

II.   Claims 22-37, drawn to an adaptive TDMA method.

III.   Claims 38-62,82-90, drawn to a point to multipoint adaptive TDD system.

IV.   Claims 63-72 drawn to a TDD system, wherein the data density with the frame is dynamically variable.

V.   Claims 73-75, drawn to a system of assigning frequency bandwidth.

VI.   Claims 76-80, drawn to a system of a modem selectively connected to a transceiver/directional antenna combination.

VII.   Claim 81, drawn to a system of adding auxiliary node.

The Applicant provisionally elects invention I, Claims 1-21 **with traverse**.
